CHAIRMAN'S STATEMENT

Dr. James Ndahiro

I am delighted to report that 2013 was a good year for Rwanda Stock Exchange (RSE). As the fundamentals of our economy continue to improve despite challenges we see our role as the stock exchange becoming even more relevant. Given the fact that the RSE was established to facilitate implementation of the country's economic reforms and encourage wider ownership of public resources, collaborative and support from the Government and other key stakeholders continues to be key towards supporting the country's economic development. The RSE strategy and Plans therefore, aims at positioning the RSE as the focus for raising capital for private enterprises and to the Government development projects through providing the platform for mobilizing savings for productive investments activities and creating investment opportunities for investors.

During 2013, RSE continued with implementation of its 5 years strategic plan where efforts and resources were directed towards preparation for the introduction of the Small and Medium Enterprise Market Segment (SMEMS), increasing on efficiency levels and raising the profile of the exchange. The outlook is exciting, as these efforts start to bear fruits i.e. increase activity, broaden the range of products, streamline the operations and commercialization of the RSE as an entity.

During the year the RSE Blue Print was reviewed so as to address and improve on various areas in line with the current market developments. The newly drafted RSE Rules Book has been approved by the Regulator.

During this period we continued our efforts towards the automation of the exchange. During the year the Market Capitalization increased the USD 2 billion mark. This achievement is attributed by efforts that we utilized to increase the market efficiency such as increased public awareness initiatives. With regard to the fixed income securities,

Trading activities in the secondary market more than tripled. The recorded performance

positively impacted the financial performance during the year. The RSE internally generated revenues increased by 71.8% from Rwf 140.1 million – 2012 to Rwf 240.6 million – 2013. The Government support through subvention decreased by 9.2% from Rwf 34.7 million in year 2012 to Rwf 31.7 million in financial year 2013. We have delivered another year of strong cash flow, which is enabling us to invest in the business and serve the market efficiently.

On behalf of the Board of Directors, Management and the rest of the members of staff at Rwanda Stock Exchange, I wish to acknowledge and extend our appreciation to the continued support of the Government of Rwanda through the Ministry of Finance to the CMA. It is our sincere belief that the Government will continue supporting the RSE for the foreseeable future.

I am also grateful to all our development partners such as Financial Sector Development Plan (FSDP), Banque National Du Rwanda(BNR) and the Private Sector Federation(PSF) for their support in developing the market. During the year under review we started the Public awareness campaigns for Small and Medium Enterprises Market segment at the RSE. We believe through these we will envisage to result into an appetite for Small & Medium Enterprises raising capital and list on the Exchange.

Again in the special way I acknowledge with appreciation the outstanding role played by all my colleagues (the Members of Board of Directors) for their continued contribution and commitment to the development of the Exchange. The concerted efforts by the Management and the Board should push even further the development agenda of the RSE in years to come.

On behalf of the Board, I would like to also thank the RSE Management and entire team of staff for their dedication and commitment in ensuring that the Exchange meets its strategic objectives even during challenging moments.

In the longer term, we remain very positive about the opportunities to grow our Exchange as we are well positioned to capitalize on the ongoing economic reforms and development in the country through providing efficient capital raising platform to support this growth.

Dr James NDAHIRO

Chairman

CHIEF EXECUTIVE OFFICER'S REPORT

Mr. Pierre Celestin RWABUKUMBA
Chief Executive Officer

MANAGEMENT

The management of RSE during the year and to the date of this report was:

Mr. Pierre Celestin RWABUKUMBA

Chief Executive Officer

Ms. Iribagiza Alice

In Charge of Administration and Finance

Mr. Robert Twagira

In charge of Information and Technology

Mr. Mitali David

In charge of Operations

1. ECONOMIC PERFORMANCE

1.1. 2013 Economic overview

Over the past two decades our country has experienced high rate of growth due to economic reforms, sound macroeconomic policies and the expending of both public and private sector. The rate of growth of Rwanda Gross Domestic Product (GDP) for the year 2013 was 4.7%. In 2014 Rwanda is expected to continue an upward trend and remain as one of the fastest growing economies in the region, the growth is expected to be 6% fueled by growth in key sectors such like infrastructure, agriculture, services sector and trade.

1.2. Price Movement (Inflation)

The annual headline inflation slightly declined from 3.9% in December 2012 to 3.7% in December 2013. The decrease in inflation was due to continued decrease in the average price of oil, also the relatively favorable weather conditions which improved agricultural harvest and relatively cheaper power generation.

2. Market performance

On the Rwanda Stock Exchange (RSE), equities trading continued on an upward trend. The two counters of BRALIRWA and Bank of Kigali still dominate in volumes, transactions and price changes.

2.1. Primary market

There was no new issuance in bond and equity market for the period under review.

2.2 Secondary market

2.2.1 Bond market

The bond secondary market remained unchanged for the period under review.

2.2.2 Equity market

On equity market during this period under review Uchumi Supermarket Market cross-listed on Rwanda secondary market from Kenya. The equity market continued an upward trend in share prices and recorded a slight increase in total turnover during the period from January – December of the year 2013. The market recorded a total turnover of Rwf 53.9 billion from 108.1 million shares in 1,750 deals compare to the same period for the previous year of 2012 where the market recorded a total turnover of Rwf 18.1 billion from 103.4 million shares in 1,563 deals. This is an increase of 197.8% in turnover, 4.83% in volume and 11.96% in number of transactions respectively over the same period. The most vibrant counters were those for BK and Bralirwa.

Comparison between turnovers for the year 2012-2013

Indices

Stock market index is defined as a statistical indicator used in measurement and reporting of changes in the market value of a group of stocks/shares. It is also defined as a method of measuring a section of the stock market. Many indices are cited by news or financial services firms and are used as benchmarks, to measure the performance of portfolios such as mutual funds.

Under measuring market performance Rwanda Stock Exchange (RSE) has two types of indices used to measure the performance which are Rwanda Shares Index (RSI) and All share Index (ALSI). During this period under review both indices performed slightly as illustrated in figures thereafter

Comparison between RSI for the year 2013 and 2012

Source: RSE, 2013

From January –December for the year under review the RSI observed an increase of 43.93% in comparing the results from the year 2012 which recorded and an increase of 65.33% from January-December.

Items share price movements on dominant firms which are Bralirwa and Bank of Kigali (BK) an slight shift observed, on Bralirwa side an increase of 33.17% observed from January to December in the year 2013 then on Bank of Kigali side an increase of 86.04% recorded from January –December in the year under review.

Comparison between ALSI for the year 2013 and 2012

Source: RSE, 2013

As computed the ALSI from January –December for the year under review registered an increase of 23.7%; taking comparison the ALSI for the year 2012 and 2013 an increase of 38.97% observed from January, 2012 to December, 2013 and 12.26% increase from January-December, 2012.

3. Activities report

3.1 Public education and Marketing

Rwanda Stock Exchange (RSE) conducted public education presentations in different public and private organizations through different seminars, presentations, TV, radios and print media.

Green Hills Academy students at RSE trading ground

- On this point of public education the RSE hosted 394 students from different universities and High Institutions including UNR, ISAE, INES, INILAK, UCR, IPB, AUCA and Umutara Polytechnic.
- Two secondary school visited RSE for the purpose of awareness of Capital Market operations those Green Hills Academy and Riviera High School.
- RSE in collaboration with CMA and Ministry of Finance organized seminars and presentations for Umurenge SACCO in all Districts of Southern Province. The aim of this program was to try to raise awareness on the culture of savings and the benefits of long term investments profitability. The program was also attended by the Districts officials, opinion leaders, business people, religious and organizations etc.

Public Education for SACCOs May 2013

- In the purpose of keeping Rwandans on the daily business on Capital Market, the daily RSE market report is broadcasted in three languages on RTV and 6 radio stations (Radio Rwanda; Radio 10, Flash FM and Voice of Africa, KFM and Isango Star). The RSE is trying to engage other media house to do the same.
- A delegation of 32 police men and women hosted by RSE in case of public education

Police men and women at RSE, 2013

- A delegation of 12 Japanese officials from the ministry of finance and the parliamentary secretary for finance received explanations from RSE member about secondary market investment, operations and procedures
- RSE hosted a delegation of 60 students from the Washington university in two groups
- In partnership with the Private Sector Federation, the RSE organized different presentations in different Districts of Rwanda whereby business operators were key focal beneficiaries with the purpose of encouraging them to participate on capital market.
- In collaboration with INES-Ruhengeri and SITI-East Africa the RSE organized a workshop on Municipal bonds which took place Rusizi in Western province.

3.2 Capacity building

RSE has developed an induction in-house training program for new entrants into the Rwanda Capital Market. RSE management conducted two induction courses in March and July 2013 for market practitioners including RSE management, member intermediary firms, other financial institutions, the media and the academia. RSE continued its internship program for the students in local universities and some from the Diaspora; This year we received at least 30 students for

internship averaging one and a half a month and others were helped to do their research for final papers in their respective schools. The RSE staff attended distinguished workshop under different institutions and organization including CMA, PSF and MINEAC as well as:

- Industrial attachment on CSD for transaction processing
- CMA regulations and guidelines
- New legal framework for Rwanda commodities exchange market
- Accessing Funding through commercial papers.

4. Legal framework

In order to have an attractive environment for capital market practitioners, RSE put in place listing rules for the Small and Medium Enterprises (SMEs) to allow this market segment to operate. The RSE also published a new fee schedule after securing the requisite approvals by the CMA.

5. Regional integration

In the course of the year, the RSE continued to contribute to regional integration initiatives by actively participating in regional meetings and forums, under EASEA and the Capital Market Insurance and Pensions (CMIPC). RSE management actively continued its participation in the Executive and Steering Committees of the EAC-Financial Sector Development & Regionalization project (FSDRP) and SITI-East Africa held in Kenya and Kigali respectively. Apart from regional initiatives, the RSE was represented in international meetings and conferences held in Abidjan and London to continue growing our network of international market players and investors.

6. Information technology infrastructure development

The Information Technology department at the Rwanda Stock Exchange (RSE), is one that nurtures creativity, change and holds the core principles of the Exchange's strategy at every stage of growth and innovation. During the year under review ICT policy and procedures manual for the department was developed. Central Securities Depository (CSD) was linked and installed at the RSE to enable the capture of transactions and fasten processing between trading at RSE and the clearing and settlement at Central Bank of Rwanda through a Virtual Private Network (VPN).

Pierre Celestin RWABUKUMBA

Chief Executive Officer

DIRECTOR

Statement of Directors' Responsibilities

Date _____

The Companies Act of Rwanda requires the directors to prepare financial statements for each financial year, that give a true and fair view of the state of affairs of the company as at the end of the financial year and of its operating results for that year. It also requires the directors to ensure the company keeps proper accounting records which disclose, with reasonable accuracy, the financial position of the company. They are also responsible for safeguarding the assets of the company.

The directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgements and estimates, in conformity with International Financial Reporting Standards and the requirements of the Companies Act of Rwanda. The directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the company and of its operating results in accordance with International Financial Reporting Standards. The directors further accept responsibility for the maintenance of accounting records which may be relied upon in the preparation of financial statements as well as designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement.

Nothing has come to the attention of the directors to indicate that the company will not remain a going concern for at least the next twelve months from the date of this statement.

The financial statements, as indicated above, were approved by the Board of Directors on 26 September, 2014 and were signed on its behalf by:

Chief Executive Officer

Date

Director

Date

Board Committees

The RSE's boards of directors divided into four committees:

1. Administration & Finance and listing committee
2. Market development and Operations committee
3. Audit committee

1. ADMINISTRATION AND FINANCE COMMITTEE

The mandate of administration and finance committee is to review the economy, efficiency and effectiveness of operations including non-financial control of the company and make recommendations to the management as well as to evaluate the performance of human resources manual and monitor the profile of the company's workforce items of consistency with the company's objectives.

Its role is to provide advice and recommendations to the board within the scope of its terms of reference / charter.

Members

1. Mr. Bahati MPUNIKIRA Chairman
2. Mr. Simon KALENZI Member

Report of the Independent Auditor's To the members of Rwanda Stock Exchange (RSE)

We have audited the accompanying financial statements of Rwanda Stock Exchange as set out on pages 6 to 20. These financial statements comprise the statement of financial position at 31 December 2013, the statement of comprehensive income, statement of changes in equity and the statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Managements' Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and the requirements of the Rwandan Companies Act. This responsibility includes: designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an independent opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depended on our professional judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we considered the internal controls relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that were appropriate in the circumstances, but not for the purpose of expressing an opinion on the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Rwanda Stock Exchange as at December 31, 2013, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of Rwanda.

Report on Other Legal and Regulatory Requirements

The Companies Act of Rwanda number 07/2009 of 27 April 2009 requires that in carrying our audit, we consider and report to you on the following matters.

We confirm that:

- i)** We are not related to Rwanda Stock exchange and have no interests or debts in the company;
- ii)** We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- iii)** In our opinion, proper books of account have been kept by the company, so far as appears from our examination of those books;
- iv)** We have communicated to you through a management letter highlighting problems linked with the company's management and our recommendations for improvement.

1. REPORTING ENTITY

The Rwanda Stock Exchange Limited was incorporated on 7th October 2005 with the objective of carrying out stock market operations. The Stock Exchange was demutualised from the start as it was registered as a company limited by shares.

2. BASIS FOR PREPARATION

a) Statement of compliance

The financial statements are general purpose financial statements which have been prepared in compliance with International Financial Reporting Standards (IFRS) adopted by the International Accounting Standards Board.

b) Basis of measurement

The financial statements have been prepared on the historical cost basis.

c) Functional and presentational currency

These financial statements are presented in Rwandan Francs (rounded to the nearest cents), which is the Company's functional currency.

d) Use of estimates and judgements

The preparation of the financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described below;

Property, Plant and equipment

Annually, directors make estimates in determining the depreciation rates for property, plant and equipment using internal technical expertise. The rates used are set out in the accounting policy for property, plant and equipment. These estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the prevailing circumstances.

Impairment of non-financial assets

The company assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. Non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

3. SIGNIFICANT ACCOUNTING POLICIES

a) Statement of Compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS's)

b) Adoption of new and revised International Financial Reporting Standards (IFRS)

Standards, amendments and interpretations to existing standards not yet effective and also not early adopted

- **IFRS 9: Financial Instruments** (Effective 1 January 2015). This IFRS is part of the IASB's project to replace IAS 39. IFRS 9 addresses classification and measurement of financial assets and replaces the multiple classification and measurement models in IAS 39 with a single model that has only two classification categories: amortised cost and fair value
- **IASB Annual Improvement Project** – As part of its fourth annual improvement project the IASB has issued its 2011 edition of improvements. The annual improvement project aims to clarify and improve the current accounting standards. The improvements include items involving terminology or editorial changes, with minimal effect on recognition and measurement.

Basis of preparation

The financial statements are prepared under the historical costs basis of accounting. The principal accounting policies are set out below.

Revenue recognition

Initial listing income is recognised in the year in which the listing company makes the flotation. Additional listing income is recognised during the year in which the issuing company makes announcement of the bonus/right issues.

Transaction levy income is based on a percentage of the value of shares traded and is recognised on the dates of the transactions.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis by reference to the principal outstanding and at the effective interest rate applicable which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount or initial recognition.

Translation of foreign currencies

Transactions in foreign currencies during the year are converted into Rwandese Francs at rates ruling at the transaction dates. Monetary assets and liabilities at the date of reporting that are expressed in foreign currencies are translated into Rwandese Francs at rates ruling at that date. The resulting differences from conversion and translation are dealt within profit or loss in the year in which they arise.

Equipment

All equipments are stated at historical cost less accumulated depreciation and impairment losses.

Depreciation

Items of property, plant and equipment are depreciated from the date that they are installed and are ready for use, or in respect of internally constructed assets, from the date that the asset is completed and ready for use. Depreciation is calculated to write off the cost of property, plant and equipment less their estimated residual values using the straight-line basis over their estimated useful lives. Depreciation is generally recognized in profit or loss, unless the amount is included in the carrying amount of another asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the company will obtain ownership by the end of the lease term. Land is not depreciated.

Depreciation is calculated on a reducing balance basis over the estimated useful life of the asset as follows,

Buildings	5%
Computer equipment, software products and data equipment	50%
Motor vehicles	25%
Furniture and fittings	25%
Communication Equipment	25%

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Intangible assets

Intangible assets represent computer software which is stated at cost less amortisation. Amortisation is calculated to write-off software on a straight line basis over the estimated useful life of 4-5 years.

Impairment of tangible and intangible assets, excluding goodwill

At the end of each reporting period, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated and an impairment loss is recognised in profit or loss whenever the carrying amount of the asset exceeds its recoverable amount.

Financial instruments

The company classifies its financial assets into the following categories: financial assets at fair value through profit or loss; loans and receivables; held to maturity investments and available for sale assets. Management determines appropriate classification for its investments at initial recognition.

(a) *Receivables*

Receivables are financial assets with fixed or determinable payments and are not quoted in an active market. After initial measurement at cost receivable are subsequently re-measured to amortise cost using the effective interest rate method less allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest rate.

(b) *Financial assets at fair value through profit or loss (FVTPL)*

Financial assets at fair value through profit or loss are those which were either acquired for generating a profit from short-term fluctuations in price or dealer's margin, or are securities included in a portfolio in which a pattern of short-term profit-taking exists. Investments classified as fair value through profit or loss are initially recognised at cost and subsequently re-measured to fair value based on quoted bid prices or dealer price quotations, without any deduction for transaction costs. All related realized and unrealized gains and losses are included in the profit or loss. Interest earned whilst holding held for trading investments is reported as investment income.

(c) *Held to maturity investments*

Held to maturity financial investments are those which carry fixed or determinable payments and have fixed maturities and which the company has the intention and ability to hold to maturity. After initial measurement, held to maturity financial investment are subsequently measured at amortised cost using the effective interest rate method, less any allowance for impairment. Amortised costs is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortisation and losses arising from impairment of such investments are recognised in the profit or loss.

(d) *Available for sale financial assets*

Investment securities intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity, or changes in interest rates, exchange rates or equity prices are classified as available for sale and are initially recognised at cost. Available for sale investments are subsequently re-measured to fair value, based on quoted bid prices or amount derived from cash flow models. Unrealized gains and losses arising from changes in the fair value of securities classified as available for sale are recognised in other comprehensive income and accumulated in fair value reserve, with the exception of impairment losses, interest calculated using effective interest method, and foreign exchange gains and losses on monetary assets which are recognised in profit or loss. When the investment is disposed of or is determined to be impaired, the cumulative gains or loss previously accumulated in the fair value reserve is reclassified to profit or loss.

(e) *De-recognition of financial assets*

Financial assets are derecognized when the right to receive cash flows from the financial assets have expired or where the company has transferred substantially all risks and rewards of ownership.

Cash and cash equivalent

For the purposes of the statement of the cash flows, cash equivalents include short term liquid investments which are readily convertible into known amounts of cash and which were within three months of maturity when acquired, less advances from banks repayable within three months from the dates of the advances.

Investments in associate

An associate is an entity over which the company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. The results and assets and liabilities of associates are incorporated in these financial statements using the equity method, investments in associates are carried in the statements of financial position at cost as adjusted for post-acquisition changes in the company's share of the net assets of the associate, less any impairment in the value of individual investments. Losses of an associate in excess of the company's interest in that associate are recognized only to the extent that the company has incurred legal or constructive obligations or made payments on behalf of the associate.

Employee entitlements

Employee entitlements to annual leave are recognized when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the date of reporting.

Retirement benefit obligations

The employees and the Company contribute to the Social Security Fund of Rwanda, a national defined contributions retirement benefits scheme. Contributions are determined by the country's statutes and the Company's contributions are charged to the income statement.

Taxation

Current taxation is provided for on the basis of the results for the year as shown in the financial statements, adjusted in accordance with tax legislation.

Deferred tax is provided, using the liability method, for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Tax rates enacted or substantively enacted at the date of reporting are used to determine deferred tax.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilized, while deferred tax liabilities are recognised for all taxable temporary differences.

Government grants

Government grants are recognized where there is a reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognized as income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset the fair value is credited to a deferred income account and is released to the income statement over the expected useful life of the relevant asset by equal annual installments.

Comparatives

Where necessary; comparative figures have been adjusted to conform to changes in the presentation in the current year.

Critical Accounting Judgements and Key Sources of estimation uncertainty

In the process of applying the company's accounting policies, management has made estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations or future events that are believed to be reasonable under the circumstances.

The key areas of judgment in applying the entities accounting policies are dealt with below:

a) Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see (b) below), that the Directors have made in the process of applying in the company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Held-to-maturity financial assets

If the company has the positive intent and ability to hold debt securities to maturity, then such financial assets are classified as held-to-maturity. Held-to-maturity financial assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, held-to-maturity financial assets are measured at amortized cost using the effective interest method, less any impairment losses. Held-to-maturity financial assets comprise debt securities.

(b) Key sources of estimation uncertainty

Impairment losses

At each date of reporting, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an

impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash generating unit to which the asset belongs.

Equipment and software

The company reviews the estimated useful lives of equipment and software at the end of each reporting period.

16. Risk Management objectives and policies

The main business risks faced by the company in respect of its principal non derivative financial instruments are market risk including interest rate risk and foreign currency risk, credit risk and liquidity risk. The directors review and determine policies for managing these risks.

Market risk

The company maintains a conservative policy regarding currency. And interest rate risks and does not engage in speculation in the markets. In additional the company does not speculate or trade in derivatives financial instruments

Interest rate Risk

Interest rate risks arise primarily from investments in fixed interest securities. The sensitivity analysis for interest rate risks illustrates how changes in the fair value or future cash flows of financial instrument will fluctuate because of changes in the market interest rates at the reporting date

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when purchases are denominated in a different currency from the Company's functional currency).

The Company manages its foreign currency risk by holding adequate bank currencies in the relevant currencies and through immediate settlement.

Credit risk

Credit risk refers to the risk that counter party will default on its contractual obligations resulting in financial loss to the company. Credit risk arises from deposit with banks as well as trade receivables. Management assesses the credit quality of each customer, taking into account its financial position, past experience and other factors. The credit risk on liquid funds is limited because the counterparties are banks with credit rating assigned by the banking regulatory authority

Credit risk from balances with banks and financial institutions is managed by the company's treasury policies. Investments of surplus funds are made only with approved financial institutions, whose credit assessment is assessed on a regular basis.

Liquidity risk

Prudent liquidity risk management includes maintaining sufficient cash to meet company obligations. The company manages the risks by maintaining adequate cash balances in the bank, banking facilities and by continuous monitoring forecast and actual cash flows.

The table below analyses the company's financial liabilities that will be settled on a net basis into relevant maturity grouping based on the remaining period at the reporting period to the contractual maturity date.

The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant

Capital Risk Management

The manages its capital to ensure that it will be able to continue as a going concern while maximising the return to stockholders through the optimisation of the equity balance

The capital structure of the company consists of share capital, member's funds and accumulated profit. The company is not subject to any externally imposed capital requirements.
